Seeking a challenging and rewarding opportunity as a software developer, offering expertise in C#, Python, database management and web development.

EXPERIENCE	**Self-Checkout Kiosk,** Mississippi Coding Academy

Goal: Build a self-checkout program that logs each transaction into a daily file
- Accurately counts and displays money totals
- Validates credit card number and returns brand of credit card used for electronic payments
- Builds transaction report: logging totals and type for each transaction

AsciiPhotoshop, Mississippi Coding Academy
Goal: Build an image processor that converts an image into ascii art
- Reads RGB data from each pixel in an image
- Averages and normalizes image kernels to a grayscale value for an ascii replacement
- Resizes ascii image based on a user defined image kernel

Software Developer, Innovate Mississippi
Starkville, MS / August 2018 – July 2019

TECHNICAL SKILLS
Languages: C#, Python, JavaScript, SQL, CSS, HTML, PHP
Frameworks: jQuery, Bootstrap, Vue.js, Node.js, Django, GreenSock
OS & DB: Windows Server, TSQL, PostgreSQL, MySQL

INTANGIBLES
Teamwork:
- Collaborated with teammates to create and implement "Code Week" in the Columbus Municipal School District.
- Worked 6+ years in customer service, the epitome of a team-oriented environment

Problem Solving:
- Troubleshot and performed minor maintenance on machines at Wear-Con
- Showcased the ability to debug code for errors and more efficient routes

Trustworthy:
- Followed safety guidelines at every job I've ever worked: to ensure the safety of not only me, but of my peers and colleagues
- Was trusted to handle and log pecuniary matters while working as a shift leader at my local Arby's restaurant
